## Specification

- Plastic (Polyamide PA)
- Glass fiber reinforced
- Temperature resistant up to $100^{\circ} \mathrm{C}$
- Black, matte
- Bushing

Steel, blackened

- Grub screw DIN 916 with internal hexagon and serrated point
- ISO Fundamental Tolerances $\rightarrow$ Page 2151
- Plastic Characteristics $\rightarrow$ Page 2158
- RoHS

## Accessory

- Position indicators GN 000.8 / GN 000.3 are to be ordered separately

## Information

Hand knobs GN 534.8 have a recess in the hub to accept position indicators GN 000.8 and GN 000.3.

They are made to a very high standard from the point of view of quality and design. Worth mentioning in particular is the profile of the rim which is unique for its form and function of these hand knobs.
For applications where these hand knobs are used without a position indicator, hub caps are available to shroud the hub.

## Installation sequence

1. Install the position indicator to the spindle and fix it with the screw.
2. Turn the spindle to the starting point ( 0 -position).
3. Move position indicator „by hand" to the 0 -position before mounting it.
4. Install the position indicator into the recess of the hub and fix it with a screw.

Do not apply unnecessarily excessive torque to avoid deformation of the housing!
5. Rotate the handwheel and ascertain that the starting point of the spindle is aligned with the 0-position of the two pointers (GN 000.8) respectively pointer and counter (GN 000.3).

Should that not be the case the screw has to be loosened and the position indicator adjusted. Tighten the screw again.
