### Types of fork joint shafts

Snap-on spring

The snap-on spring is easily mounted and dismantled. It is therefore particularly suitable for applications where the articulated connection needs to be loosened often.

KL-shaft safety

The KL-shaft safety ring can be fitted and dismantled without tools, i.e. by hand.

SL-shaft safety

The SL-shaft safety ring requires a tool for dismantling (e.g. a screw driver). It is therefore better secured.
